

A highly flexible program that will fit every lesson you teach, everyday of the week

2Publish+ brings you a whole host of new exciting publishing opportunities such as leaflets, posters, certificates, comic strips, coins, money, stamps, postcards and picture tables. If you already have the hugely popular 2Publish (from the Infant Video Toolkit) you'll be pleased to know that with 2Publish+ we've built more on to your favourite border, newspaper and card screens too! You can draw and import images and even use images captured straight from a webcam in many of the activities!

Just some of the templates included in 2Publish+ are:

Design your own postcard, write a message on the back, fill in the address and you're ready to send it - just don't forget your stamp!

Publish your own newspaper! Change the height & number of text columns and image fields, add a headline and you're ready to hit the news stands

Create your own leaflets. Draw or import images & edit text

Quickly and easily create multiple copies of cards, play bank notes. Also features automatic numbering - perfect for raffle tickets etc

Draw pictures, or capture images from a webcam. Add speech bubbles and write captions to create simple comics

Draw an image or diagram and add labels or notes anywhere on the image. Labels are editable; move them around, change the font and colour

All 2Simple software is available on 30 days approval.
