

AlphaSmart 3000

At AlphaSmart we have always believed that to be meaningful and accessible, our technology must be both simple and cost-effective. We will never lose site of this fundamental principle, and our commitment is to provide solutions that will always make the challenges of learning easier and more affordable than ever.

Acclaimed for its ease-of-use and practicality, the AlphaSmart 3000 is used in over 4,500 school districts across the United States and around the world. Dana continues our commitment to simplicity, while providing enhanced functionality and access to the ever-expanding world of Palm OS.

AlphaSmart. Solutions that are just plain smart.

AlphaSmart 3000

Why less truly is more.

If ever there was proof of the value of a simple idea, the AlphaSmart 3000 is it. Extremely lightweight and simple to use, the AlphaSmart 3000 is the ultimate writing tool. Its complete portability and low cost ensure that every student in your classroom can have their own writing and test-taking device.

Rugged good looks.

We know kids! That's why we engineered the AlphaSmart 3000 to handle anything they might do to it, and the translucent plastic shell doesn't just stand up to a four-foot drop test, it also appeals to students visually. The ergonomic keyboard and easy-to-read display make the AlphaSmart 3000 a great learning tool for young typists. And with a runtime of over 700 hours from 3 AA batteries, students will be encouraged to use their AlphaSmart 3000s consistently and often.

Ready. Set. Go!

Turn it on and go—just start typing. The AlphaSmart 3000 automatically saves your documents as you type. And with no warm-up, no disk drive, no commands, and no need for a monitor, it's no wonder it's been described as the "word processing toaster."

Just plain Smart.

The AlphaSmart 3000 comes loaded with the AlphaWord word processor and Calculator. More functionality can be added by installing other SmartApplets, such as programs that improve keyboard skills and quiz taking. With the built-in USB and optional infrared ports, it's easy to transfer files between the AlphaSmart 3000 and the teacher's Macintosh or PC.

Dana Wireless

The Palm Powered™ laptop alternative that's truly affordable—and now wireless

Dana Wireless offers the convenience and affordability of a hand-held device, and is now available with Wi-Fi (802.11b), providing wireless connectivity for home, office, classroom, and campus—or in any of the thousands of Hot Spots around the country.!

Portable, durable, and wireless.

Dana Wireless continues our tradition of ultra-light portability and simplicity. With built-in Wi-Fi technology, getting connected has never been easier. Browse the web or check your email without a modem or cable.!

The Power of Palm OS®.

With Palm OS, you have access to thousands of applications. And we push Palm OS further by including a full-size keyboard and a screen that's 3.5 times wider than the typical hand-held screen. You can type or enter data using the keyboard or by writing with the Dana stylus directly onto the screen.

Dana runs on a rechargeable battery pack or its AC adapter (both included). In a pinch, you can easily replace the battery pack with three standard AA batteries.

- Dana is lightweight and durable. Easy to carry in a briefcase, backpack, purse, or under your arm.
- Dana is the ideal solution for writing papers, taking notes, collecting data, or organizing personal information.
- AlphaWord (a full-featured word processor) and the Palm eBook reader give you the power to read and write anywhere. Easily synchronize documents with your desktop computer.
- Date Book, Address Book, To Do List, and other software provide convenient access to important personal information.

The optional Dana Internet Solutions Pack comes with the Internet tools you need, like the wide screen Dana web browser, email and instant messaging programs.
