

## Nessy GamesPlayer

**Improves reading and spelling skills through fun games.**

Journey to the distant mountains of Ness, hatch the mystery egg and grow your own pet monster. As Nessy grows you are led through a series of motivating computer games that follow a structured reading and spelling programme devised by specialist teachers.

Nessy GamesPlayer uses game-based learning with graphics and games that meet the high demands of today's 'Playstation generation' of children. Game-based learning rapidly improves reading and spelling but to be really effective Nessy GamesPlayer has been designed to create a multi-sensory learning environment (see, hear, say and do). All the words introduced in the games have been carefully graded to ensure a steady progression. Multiple levels cater for children of all ages and abilities.

Nessy GamesPlayer was developed from the core games in the Nessy Learning Programme, and is ideal for home and school use. It can support and reinforce classroom use of Nessy or it can be followed independently. Users can record their own words to play the games or select from the comprehensive pre-recorded lists. The range of difficulty options makes GamesPlayer suitable for both gifted students and those who need additional support.

GamesPlayer guides children without supervision, just leave them to it and see them reap the benefits in confidence and ability.

- Improve spelling
- Increase reading speed
- Extend vocabulary
- Build self-confidence and self-motivation
- Ideal as a home support
- Learn as you play

The final reward will be secret words that will allow you to command and keep a pet Nessy on your computer.
