

The Nessy Suite of Programmes

NESSY is a suite of five computer programs that can be used individually or in combination.

1. **Nessy Learning Programme** - *the foundation program of the Nessy suite.* An interactive, multimedia resource consisting of 120 lessons supported by a wealth of printable resources and interactive computer games. Each lesson follows a structured, phonic approach supported by hundreds of printable card games, activity sheets, mnemonics, reading and spelling assessments, storybooks and animated computer games.
2. **Nessy Games Player** - *developed from the core games in the Nessy Learning Programme,* Ideal for home and school use, Games Player can support and reinforce classroom use of Nessy or it can be followed independently. Users can record their own words to play the games or select from the comprehensive pre-recorded lists.
3. **Nessy Tales** - *a fun new way to improve children's reading, vocabulary and listening skills.* A series of five animated reading books, structured with a limited vocabulary while retaining a vivid storyline. The learning structure follows the UK National Curriculum, advancing from C-V-C words (e.g. t-a-p), to C-C-V-C (e.g. t-r-a-p), building to C-C-V-C-C (e.g. t-r-a-m-p) in book 5. Great on an Interactive Whiteboard.
4. **Nessy Fingers** - *a touch typing program for 8-14 year-olds.* Helps improve spelling and keyboard skills. Key positions are taught in the sequence of the alphabet for rapid learning in 5 short lessons. Nine levels of difficulty, in a multi-sensory environment, make practice great fun and students can import tunes from a portable mp3 player and type to their own music.
5. **BrainBooster Study Skills** - *designed for older dyslexic users.* Uses animations, interactive activities and speech-enabled information to cover reading, writing, revision, organisation, memory and learning styles. This essential interactive guide reveals the secrets of study skills, including speed reading & key point finding, memory & organisational strategies, improving writing clarity & structure, alternative ways to revise & recall, and help with essay planning & writing.

Megan Storm Speech Pathologist. Perth, WA

"The Nessy Programme is a carefully and cleverly designed therapy tool that combines the phonological learning of reading and spelling with fun computer games and activities. As a Speech Pathologist working extensively with children who present with moderate to severe literacy difficulties I have found this programme to be an invaluable resource."

Everyone Loves Nessy

'This is great – it doesn't feel like work!' **Jamie, dyslexic student**

'My son asked if he could read to me last night! Thank you so much for giving me my son back. He is a changed child.' **parent**

'This programme has such depth and breadth and is so easy to follow. I feel I know what to teach next, and it is so easy to record progress.' **teacher**
