

Scally's World: Letters and Nouns

Everything children need to know about letters and nouns and the sounds they make

In this new addition to our 'Scally' family of titles, children help Scally explore the funny shapes, amazing sounds and wonderful words that letters start and make.

The Letters & Nouns software features Scally in 16 carefully graded interactive activities, each of which can use up to 140 words taken from the National Literacy Strategy and the First Words Checklist which is published by the Down Syndrome Educational Trust. Each word is cleverly illustrated to aid letter and letter blend recognition, and to develop whole-word sight vocabulary. Correct answers are rewarded by bringing the word to life in a charming animation - just watch their reactions when Scally floats, swims or flies up the screen in the (optional) progress bar!

Children can listen to letter names or sounds and can of course hear whole words too.

Teacher options are at hand along with a range of different 'looks' for different age-groups.

Scally's World: Letters & Nouns has perfect support material for teaching synthetic phonics.

Age range: 3-7 years

Supplied with

- Handbook
- 4 Colouring sheets
- Flashcards (print from the CD)

Reviews and quotes

"As a tool for enhancing early Literacy skills in the classroom, Scally's World: Letters & Nouns has got to be one of the best packages around." - TEEM
