

## Communicate: In Print

### The first genuine symbol desktop publishing program!

Communicate: In Print: is a flexible symbol-supported desktop publishing package for creating books, worksheets, newsletters and posters.

The program is supplied with the complete Wigit Rebus Symbol Set. This is well known by symbol users and acts as an excellent comprehensive set of line drawings for use in supporting literacy. Many mainstream primary schools are finding these an invaluable tool in enabling genuine inclusion.

### Communicate: In Print features:

- 6000 line drawings to support literacy
- 1000 coloured pictures for illustration
- Flexible layout
- Speech bubbles
- Pictorial spell checker
- Great for creating learning materials

### PRINTING

You can use one document to print on A4 paper ready to fold as an A5 book. the same document can be used to print sheets to staple or bind to make an A4 book. The program will also scale further on larger printers.

Communicate: In Print will automatically paginate your books making printing easier.

### GRAPHICS

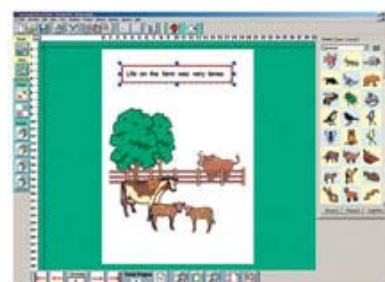

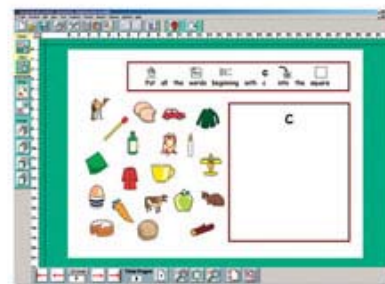

Text and graphic boxes can be freely moved about on the page, they can be sized, grouped and arranged front to back.

The coloured images supplied come with an inbuilt picture browser and the images enable an extensive range of composite pictures to be built up.

Objects can be rotated to create special effects. Graphics can be very easily flipped and inverted.

### FEATURES:

- **Speech bubbles**  
Speech bubbles give endless opportunities for dialogue to bring pictures and stories alive. Simply put a speech bubble on the page and type straight in with plain text or text and images.
- **Colours**  
The colours in the pictures supplied with the program can be edited, giving scope for imaginative work as well as early cognitive tasks

- **Frames**  
Frames are great for making Flash cards and other learning materials. Cards like these are used in mainstream schools to make words more concrete. Using cards with pictures or symbols can help beginner readers link the word to the idea. You can add the word to the picture or have the words on separate cards for matching.
- **Templates**  
Text or graphic boxes can have frames, which can be copied to all pages to make standard layouts or templates for students to write in. Pictures placed into an empty frame will automatically be sized to fit. There is an easy way of page numbering and you can start the numbering at any page. You can also easily create the same text or images on all pages. This makes adding headers or footers very simple..
- **Language Support**  
Simply type and see the images appear. This can be used to support writing by seeing the meanings of the words. You can see the graphic alternatives as you type so you can easily select the one that best illustrates the meaning. Type using just text or text and symbols. Speech can be used as feedback when you type as a writing aid - or listen to your writing, spoken `sentence by sentence` afterwards. Drag & drop or click to put your own pictures onto words to personalise their meaning. Images of your own are automatically stored with the file for moving to other machines. Multiple levels of undo and redo. You can add lines with or without arrows and in a variety of styles.
- **Pictorial spell checker**  
The pictorial spell checker shows the suggested alternatives, illustrated with an image. You can hear the suggestions spoken. This makes it easier to choose the word that matches the meaning you want. You can try a word in context and listen to the sentence before confirming it is ok and moving to the next misspelling.

## MAKE BOOKS, POSTERS AND WORKSHEETS

Communicate: In Print has all the functions of a symbol processor wrapped up in a DTP. It has full symbol functionality alongside freedom of layout.

It can automatically add symbols to your writing. Type and the images appear. This is ideal for making differentiated materials to use in inclusive settings. You can make books with alternative material on facing pages.

Pictures support language by helping to make words concrete and can give confidence to students struggling with English.
