

Kidspiration v3 **[Win or Mac]**

Kidspiration 3 (suits ages 4-10) teaches emerging readers/ writers to clarify thinking, and to process, organise and prioritise information.

Kidspiration is a visual learning tool for primary pupils, and provides a natural, intuitive way to help emerging readers and writers begin to categorise and organise their thoughts and information.

Particularly useful for English, Science and History, with a number of templates available to get ideas flowing.

The visual way to explore and understand words, numbers and concepts

Features:

- Develops thinking, literacy and numeracy skills using the proven principles of visual learning.
- Strengthens word recognition, vocabulary, comprehension and written expression in literacy.
- With new visual maths tools, pupils build reasoning and problem-solving skills.
- Across the curriculum, **it** supports personalized learning, allowing pupils to express their creativity and thoughts with pictures, words and numbers.

Visual learning with Kidspiration builds essential skills across the curriculum.

Using Kidspiration, pupils show and explore ideas and relationships, organise information and build critical thinking skills with graphic organisers including webs, concept maps and Venn diagrams.

Strengthen literacy skills.

Pupils create graphic organisers to organise and explain information visually. They develop stories and descriptions using engaging visual tools, demonstrate comprehension in pictures and words and improve written communication in Writing View.

Build conceptual understanding in Maths

Pupils build strong numeracy skills using visual maths tools that combine the hands-on learning power of manipulatives with the added benefits of computer interactivity.

Integrated Picture and Writing Views

Connect visual thoughts with written expression—Pupils create graphic organisers by combining pictures, text and spoken words to represent thoughts and information in Picture View. With a simple click they switch to Writing View and connect these visual thoughts to words, expanding their ideas into written expression.

ENHANCEMENTS

- 3,000+ searchable symbols and the Symbol
- Maker drawing tool
- Visually express thoughts and ideas—Pupils use keywords to search for the right image or graphic in the Symbol Library, and create symbols with familiar drawing tools to convey meaning and personalise thoughts and ideas.

NEW Kidspiration Word Guide

Learning Expertise
And Resources Network

Build vocabulary and comprehension—A combination dictionary and thesaurus covers nearly 13,000 words, including sight vocabulary aligned with Fry’s Instant Word List, Dolch Word List, the NLS High Frequency Words and TESL vocabulary.

ENHANCED Audio support

Make important literacy connections—Longer recording times encourage pupils to express and document their ideas. Teachers enjoy greater flexibility when recording instructions and comments. Pupils use the Listen tool to hear any text read aloud, strengthening word recognition and comprehension.

Kidspiration SuperGrouper

Visually categorise and group ideas—SuperGrouper shapes offer pupils a visual way to sort, group and classify objects and ideas. With the new Kidspiration Maths SuperGrouper™, pupils show their maths problem solving visually.

ENHANCED - More than 140 classroom-ready cross-curricular resources

Quickly engage pupils in learning—Activity templates, lesson plans and other teacher tools help teachers use visual learning successfully, right from the start.

NEW - Kidspiration visual maths tools

Understand essential concepts in maths—Kidspiration’s new Maths View helps pupils explore and master the core conceptual foundations of counting, place value, computation and geometric thinking. Pupils build number sense, spatial reasoning and an understanding of the meaning behind the four basic operations.
